

SUJAL V KANCHAN

Software Engineer | AI Engineer | Full-Stack Developer

📍 Mangaluru, Karnataka, India 📞 +91 8050105730 ✉️ sujal.vk888@gmail.com 🔗 [linkedin.com/in/sujal-v-kanchan](https://www.linkedin.com/in/sujal-v-kanchan)
🐙 github.com/sujalvk888 🌐 <https://sujalvk.vercel.app>

Information Science & Engineering student focused on AI-powered and full-stack application development. Built and deployed multiple production-ready AI-powered and full-stack applications using Next.js, React, FastAPI, PostgreSQL, MongoDB, and Large Language Models (LLMs). Experienced in RESTful APIs, authentication, cloud deployment, and real-time data integration. Presented IEEE research on AI-powered voice-enabled commerce and contributed to published patent applications in AI-driven systems.

EDUCATION

Canara Engineering College | Visvesvaraya Technological University (VTU)

Mangaluru, Karnataka

Bachelor of Engineering (B.E.) in Information Science & Engineering

2022 – 2026

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend:	React.js, Next.js, Tailwind CSS, shadcn/ui
Backend:	Node.js, Express.js, FastAPI, RESTful APIs
AI & Data:	Groq API, Ollama, LangGraph, OpenAI SDK, NumPy, Pandas
Databases & Cloud:	PostgreSQL, MongoDB, Supabase, Vercel, Render, Cloudinary
Developer Tools:	Git, GitHub, Postman, VS Code

WORK EXPERIENCE

SuprMentr Technologies Pvt. Ltd. — Full-Stack Development Intern

Feb 2026 – May 2026

In partnership with Visvesvaraya Technological University (VTU), Belagavi

- Designed and developed full-stack MERN applications with responsive React frontends, scalable Express RESTful APIs, and MongoDB-backed data models.
- Built an end-to-end e-commerce application integrating responsive front-end interfaces, backend APIs, MongoDB persistence, and AI-assisted features.
- Led a 4-member team for the final internship project, coordinating development tasks while contributing to application architecture and implementation.
- Implemented secure authentication, RESTful APIs, database operations, responsive UI design, and cloud deployment across multiple internship projects.

PROJECTS

FINVISE.AI — AI-Powered Financial Analysis Platform | Next.js, TypeScript, FastAPI, Python, Groq, Ollama

Jun 2026

- Built an AI-powered financial analysis platform using Next.js and FastAPI that combines real-time market data with LLM-generated financial insights.
- Integrated Finnhub for real-time market data and implemented Groq cloud inference with Ollama as a local LLM fallback.
- Developed interactive financial dashboards with AI-generated company insights, stock trend visualizations, and real-time market analytics.
- GitHub: github.com/sujalvk888/finvise-ai | Live: <https://finvise-ai-one.vercel.app>

Infidocs AI — AI-Powered Document Intelligence Platform | Next.js, React, TypeScript, Supabase, AI/LLM Integration

Jun 2026

- Built an AI-assisted document platform enabling users to upload documents and query document content through an interactive LLM-powered interface.
- Implemented Supabase authentication and responsive document-management workflows using Next.js, React, and TypeScript.
- GitHub: github.com/sujalvk888/infidocs-ai | Live: <https://infi-docs-ai.vercel.app>

Airbnb Clone — Full-Stack Property Booking Platform | React, Node.js, Express.js, PostgreSQL, Cloudinary, Stripe

Jun 2026

- Built a full-stack property booking application using React, Node.js, Express.js, and PostgreSQL with RESTful API architecture.
- Integrated Cloudinary for property-image management and Stripe for payment processing, with PostgreSQL hosted on Neon.
- GitHub: github.com/sujalvk888/airbnb-clone | Live: <https://airbnb-clone-fullstack-web.vercel.app>

RESEARCH & ACHIEVEMENTS

- IEEE Research Publication (2026):** Published the research paper "AI-Powered Voice-Enabled Real-Time Product Ordering System" in IEEE, presenting an AI-driven voice commerce solution integrating speech recognition, natural language processing (NLP), and real-time order automation. Independently presented the research at the 2026 International Conference on Artificial Intelligence and Data Engineering (AIDE 2026).
- Published Patent Application (2025):** Contributed to the development of "Automated Product Ordering System via Voice Call," an AI-powered voice ordering solution that combines speech recognition, NLP, secure user authentication, and automated transaction processing.
- Published Patent Application (2025):** Named as the first inventor on "PrivAI – Intelligent Privacy Detection and Protection Solution for Social Media Users," an AI-powered privacy solution leveraging computer vision and NLP to identify sensitive information and enhance user privacy across social media platforms.
